K&M SHOOTING COMPLEX OVERVIEW

K&M SHOOTING COMPLEX OVERVIEW

K&M Shooting Complex Overview
K&M Shooting Complex is a purpose-built firearms and tactical training facility designed to meet the demanding requirements of military, Special Operations, law enforcement, government, and private sector organizations. Our Military and Law Enforcement Training Division provides professional firearms and tactical instruction, mission-specific training programs, and dedicated facility access tailored to each organization's operational objectives.

Experienced Instruction. Mission-Focused Training.
Our instructor cadre combines operational experience and competitive expertise from Special Operations, military instructors, law enforcement, and nationally accomplished precision rifle competitors. This unique blend of experience, combined with our purpose-built infrastructure, is simply unrivaled. It allows K&M to deliver adaptable training across precision rifle, pistol, carbine, and integrated tactical disciplines. Programs are tailored to each organization's operational requirements, personnel, equipment, and desired outcomes.

Purpose-Built Infrastructure. Maximum Training Efficiency.
Designed from the ground up specifically for firearms and tactical training, K&M Shooting Complex was developed through decades of experience and a comprehensive understanding of premier military installations, shooting ranges, and training facilities nationwide. Routinely referred to as the "Augusta National" or "Disney World of training facilities," K&M offers a training environment where the mission dictates the infrastructure, not the other way around.

The complex features more than a dozen ranges capable of supporting simultaneous training operations, engagements extending beyond 1,350 yards, automated moving target systems, a 270-degree impact area, and diverse wooded, urban, and open-field environments. Modular targets, barricades, and training infrastructure allow configurations to be tailored to specific weapon systems and training requirements.

K&M's integrated infrastructure maximizes training efficiency by allowing multiple training elements to operate concurrently and units to transition effectively between disciplines. On-site lodging, classrooms, equipment storage, and additional support amenities further reduce logistical demands and maximize productive training time.

Flexible Support. Proven Capability.
K&M routinely supports domestic and international military and Special Operations units, SWAT/SRT law enforcement teams, government agencies, and other professional organizations. Whether providing comprehensive instructor-led programs, specialized training, or dedicated range access for unit-directed exercises, our focus remains the same: delivering a professional, efficient, and adaptable training environment built around the mission.

K&M SHOOTING COMPLEX RANGE OVERVIEW & VIDEOS

All targets/props are modular and are repositioned depending on training requirements/weapon system(s) utilized

1200 Yard Known Distance Range

Disciplines: Precision Rifle, Carbine, Pistol

CLASSROOM & SUPPORT FACILITIES

K&M Shooting Complex provides dedicated instructional, recreational, and fitness facilities designed to support military and law enforcement personnel throughout multi-day training operations. These amenities are conveniently located on-site, reducing logistical requirements while providing a complete environment for all needs.

CLASSROOM & INSTRUCTIONAL FACILITIES

Classroom accommodating 30+ personnel, conveniently located near the primary training ranges. The dedicated instructional environment supports multimedia presentations, tactical briefings, classroom instruction, and after-action reviews. Proximity allows for efficient transitions between academic instruction and practical field exercises.

EXECUTIVE CLUBHOUSE

Dedicated clubhouse featuring a lounge and bar area, providing a comfortable, centralized gathering space for visiting personnel. The clubhouse supports informal meetings, team discussions, and relaxation following demanding training evolutions.

8,700 SQ. FT. COVERED PAVILION

Expansive covered pavilion equipped with audio/visual capabilities, large-group assemblies, operational briefings, catered meals, equipment preparation, and firearm maintenance.

ON-SITE PRO SHOP

Fully stocked Pro Shop offering precision rifles, optics, ammunition, shooting accessories, and essential equipment from leading industry manufacturers. Allows personnel to purchase supplies, replace equipment, and address training-related needs without leaving the facility.

OUTDOOR RECREATION & COOKING FACILITIES

Outdoor amenities include a firepit, two BBQ grills, a fishing pond, and cornhole boards. These facilities provide opportunities for on-site dining, recreation, and team building during downtime between training operations.

ON-SITE FITNESS CENTER

Dedicated gym located near the clubhouse and lodging facilities, providing fitness equipment for personnel to maintain physical conditioning throughout extended training operations.

FACILITY CAPABILITIES & EVENT REQUESTS

ADDITIONAL OPERATIONAL CAPABILITIES

- Helicopter Landing Zones (LZ/DZ) and aerial gunnery options available
- Marathon Targets with mapped scenarios; programmable capabilities forthcoming
- High-speed fiber optic Wi-Fi throughout the facility
- Four UTVs available for on-site transportation and training support
- Vehicle access throughout designated training areas, year-round
- Two large equipment storage buildings, including a covered weapon maintenance area
- Secure shipping, receiving, and equipment storage
- Three full-size refrigerators and commercial ice machine
- Customized catering arrangements available upon request

SAFETY & MEDICAL SUPPORT

Medical Evacuation Plan available
Trauma kits strategically located throughout the facility
Local trauma centers approximately 45 minutes away:

Jackson General Hospital
Magnolia Regional Health Center

REQUEST TRAINING EVENTS & FACILITY ACCESS
